

## **Job Description**

### **Web Developer – Contract**

#### **Job Summary:**

We are seeking an experienced web developer to build new web pages, edit existing ones, and assist in a massive redesign and overhaul of our entire company website built through WordPress. The right person for this role will be proficient in HTML, CSS, JavaScript, etc. You will be responsible for building and deploying new front-end features to our website along with editing existing features as directed by internal marketing leadership.

#### **Job Responsibilities:**

- Write well-designed, testable, efficient code by using web development best practices
- Create basic website layouts and user interfaces with HTML and CSS
- Integrate data from various back-end web services and databases
- Work with stakeholders to gather and refine specifications and requirements based on technical needs
- Ensure cross-browser compatibility of new features
- Be responsible for maintaining, expanding, and scaling our site
- Collaborate with internal graphic designers and content creators to realize visual design intent
- Create and maintain software documentation

#### **Key Requirements:**

- Bachelor's degree in computer science, web development, software development, or related field
- Web development fundamentals, including HTML, CSS, and JavaScript
- Front-end JavaScript frameworks such as Vue, React, and Angular
- Content management systems (CMSs) such as WordPress
- UI/UX design experience
- Working knowledge of graphic design
- Agile and test-driven development best practices
